-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 10 July 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 36-46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 36-41, and 45, the expression "the or each" is not fully understood by the Examiner, thus does not clearly express the meaning of the limitations that following the expression.
3. For the purpose of this Office action, the claims will be examined as best understood by the examiner

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 36, 37, 42-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Henderson.

Henderson discloses a sprinkler head 26 suitable for use in forming a radiant heat barrier in the form of droplets of fire-fighting fluid in at least a single plane, the sprinkler head 26 comprising: at least one hollow radial arm 64, a hub 34 operatively connected to the at least one hollow radial arm 64 so that the at least one hollow radial arm 64 may pivot about the hub so as to spin in a radial plane when in use;

Art Unit: 3752

an extension 64 (a portion near the end of nozzle 66) operatively connected to each hollow radial arm 64, the extension being disposed at an angle to the at least one radial arm 64, within the radial plane, and being disposed at an outer end of, and in fluid communication with each of the respective hollow radial arm 64; and

a nozzle 66 to allow egress of fire-fighting fluid from the or each extension, and sprayed therefrom to form the radiant heat barrier in the at least radial plane.

With respect to claims 45-46, the apparatus shown by Henderson is capable of performing the method or steps recited in the claims.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 38-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Henderson in view of Partridge.

Henderson teaches all the limitations of the claims except for one or more apertures provided along each of the radial arm. However, Partridge discloses a rotatable sprinkler head having at least one hollow radial arm 1 with one or more apertures 11 along the length of the arm, a hub 6 that allowing the hollow radial arms 1 to spin in a radial plane (see figure 2). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Henderson with one or more apertures provided along each of the radial arm as suggested by Partridge. Doing so would provide an effective way to fight fires.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a sprinkler head: Hagen, Siler, Hayes, and Naedler.
